

# Pascal is a Language

Pascal is a language , with a complex set of rules,

Pascal is a language , not easily learned by fools,

Pascal is a language, with it's very own syntax,

Pascal is a language , you have to know the facts.

\*\*\*\*

Coman's has a pascal , with a language all his own,

Coman's has a pascal , an expert I hear you groan,

Coman's has a pascal , a few words he'll have for you,

Coman's has a pascal , and he can also talk for two.

\*\*\*\*

But if you knew our Pascal, What ? I hear you scoff,  
but if you knew our Pascal , sometimes you have to cough.

But if you knew our Pascal, I know you'd like him too,

But if you knew our Pascal, He's a bit like me and you.

\*\*\*\*
